

News Release

EMBARGOED UNTIL RELEASE AT 8:30 A.M. EST, THURSDAY, NOVEMBER 30, 2017

BEA 17-63

Technical: James Rankin (Personal Income) (301) 278-9087 piniwd@bea.gov
 Kyle Brown (PCE) (301) 278-9086 pce@bea.gov
 Media: Jeannine Aversa (301) 278-9003 Jeannine.Aversa@bea.gov

Personal Income and Outlays: October 2017

Personal income increased \$65.1 billion (0.4 percent) in October according to estimates released today by the Bureau of Economic Analysis. **Disposable personal income** (DPI) increased \$66.1 billion (0.5 percent) and **personal consumption expenditures** (PCE) increased \$34.4 billion (0.3 percent).

Real DPI increased 0.3 percent in October and **Real PCE** increased 0.1 percent. The **PCE price index** increased 0.1 percent. Excluding food and energy, the PCE price index increased 0.2 percent.

	2017				
	June	July	Aug.	Sept.	Oct.
	Percent change from preceding month				
Personal income:					
Current dollars	0.0	0.3	0.2	0.4	0.4
Disposable personal income:					
Current dollars	0.0	0.2	0.1	0.4	0.5
Chained (2009) dollars	-0.1	0.1	-0.1	0.0	0.3
Personal consumption expenditures (PCE):					
Current dollars	0.1	0.4	0.2	0.9	0.3
Chained (2009) dollars	0.1	0.3	0.0	0.5	0.1
Price indexes:					
PCE	0.0	0.1	0.2	0.4	0.1
PCE, excluding food and energy	0.1	0.1	0.1	0.2	0.2
	Percent change from month one year ago				
Price indexes:					
PCE	1.4	1.4	1.4	1.7	1.6
PCE, excluding food and energy	1.5	1.4	1.3	1.4	1.4

The increase in personal income in October primarily reflected increases in wages and salaries and personal interest income (table 3).

The \$13.1 billion increase in real PCE in October reflected an increase of \$11.4 billion in spending for goods and a \$2.7 billion increase in spending for services (table 7). Within goods, other nondurable goods, which includes prescription drugs and recreational items, was the leading contributor to the increase. Within services, the largest contributor to the increase was spending for other services, which includes passenger fares for foreign travel and communication services. Detailed information on monthly real PCE spending can be found in [Table 2.3.6U](#).

Personal outlays increased \$38.7 billion in October (table 3). **Personal saving** was \$457.3 billion in October and the **personal saving rate**, personal saving as a percentage of disposable personal income, was 3.2 percent (table 1).

Updates to Personal Income and Outlays

Estimates have been revised for April through September. The percent change from the preceding month for current-dollar personal income, and for current-dollar and chained (2009) dollar DPI and PCE -- revised and as published in last month's release -- are shown below.

	Change from preceding month							
	August				September			
	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>

Chained (2009) dollars	-8.7	-2.5	-0.1	0.0	76.0	58.5	0.6	0.5

QCEW Data Included in the Second Quarter of 2017

This news release includes revised estimates of wages and salaries, personal taxes, and contributions for government social insurance for April through June 2017 (second quarter). These estimates reflect the incorporation of the most recently available second-quarter wage and salary tabulations from the Bureau of Labor Statistics' Quarterly Census of Employment and Wages (QCEW) program.

Hurricanes Harvey and Irma

The August and September estimates of personal income and outlays reflect the effects of Hurricanes Harvey and Irma. BEA cannot separately quantify the total impact of the storms on personal income and outlays because most of the source data used to estimate the components of personal income and outlays do not separately identify storm impacts. BEA made adjustments to estimates where source data were not yet available or did not fully reflect the effects of the storms.

For more information on the treatment of disasters within the national income and product accounts, see [“How are the measures of production and income in the national accounts affected by a natural or man-made disaster?”](#)

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Disposable personal income is the income available to persons for spending or saving. It is equal to personal income less personal current taxes.

Personal consumption expenditures (PCE) is the value of the goods and services purchased by, or on the behalf of, "persons" who reside in the United States.

Personal outlays is the sum of PCE, personal interest payments, and personal current transfer payments.

Personal saving is personal income less personal outlays and personal current taxes.

The **personal saving rate** is personal saving as a percentage of disposable personal income.

Current-dollar estimates are valued in the prices of the period when the transactions occurred—that is, at "market value." Also referred to as "nominal estimates" or as "current-price estimates."

Real values are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

For more definitions, see the [Glossary: National Income and Product Accounts](#).

Statistical conventions

Annual rates. Monthly and quarterly values are expressed at seasonally-adjusted annual rates (SAAR). Dollar changes are calculated as the difference between these SAAR values. For detail, see the FAQ "[Why does BEA publish estimates at annual rates?](#)"

Month-to-month percent changes are calculated from unrounded data and are not annualized.

Quarter-to-quarter percent changes are calculated from unrounded data and are displayed at annual rates. For detail, see the FAQ "[How is average annual growth calculated?](#)"

Quantities and prices. Quantities, or "real" volume measures, and prices are expressed as index numbers with a specified reference year equal to 100 (currently 2009). Quantity and price indexes are calculated using a Fisher-chained weighted formula that incorporates weights from two adjacent periods (quarters for quarterly data and annuals for annual data). "Real" dollar series are calculated by multiplying the published quantity index by the current dollar value in the reference year (2009) and then dividing by 100. Percent changes calculated from real quantity indexes and chained-dollar levels are conceptually the same; any differences are due to rounding.

Chained-dollar values are not additive because the relative weights for a given period differ from those of the reference year.

p Preliminary

r Revised. Revisions include changes to series affected by the incorporation of revised wage and salary estimates for the second quarter of 2017.

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

^r Revised. Revisions include changes to series affected by the incorporation of revised wage and salary estimates for the second quarter of 2017.

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.
